

# Neuroscience Scholars Program

## Current undergrad seeking STEM Research Experience?

Our **Neuroscience Scholars Program** is a 1-2-year mentored summer research training program designed to prepare current **undergraduates from Historically Black Colleges and Universities (HBCU) and local Under-represented in Biomedical Research (URBR) programs** for graduate school and STEM careers. The program also provides high school students from **Baltimore City Public Schools** with research experiences to enhance their journey towards college as STEM majors.

## Program Highlights:

- Partnership with YouthWorks Programs
- Summer stipend
- 6-week mentored summer research experience working on an individualized summer research project
- Continued access to scientific mentors throughout academic year
